North Dakota K-12 School Funding Formula

In 2013, the state implemented a K-12 funding formula tied to the cost of providing an adequate education and funded it with a combination of state and local taxes. Local property tax levy authority was decreased significantly with statewide taxes making up the difference. Statewide taxes are now funding approximately 75% of the cost of education.

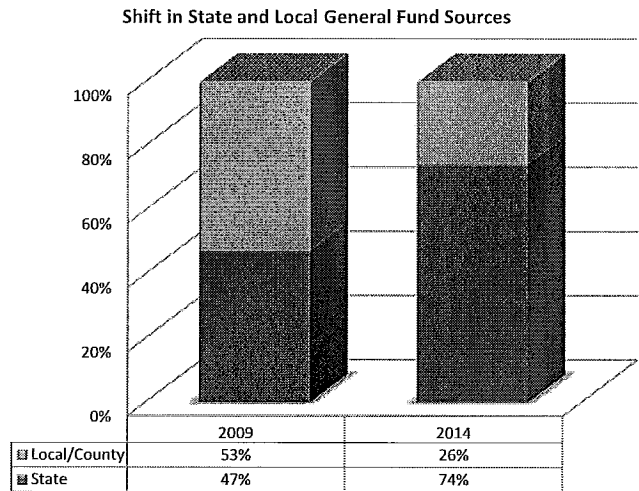

The local share is 60 mills on taxable valuation and 75%-100% of other local in-lieu of property tax revenue. The state funds the remainder up to the adequate amount.

The formula is student driven and uses various weights to account for the increased costs associated with school district size and serving students with special needs. A base per student funding rate is set by the legislature designed to generate the resources necessary to educate students to state standards. In addition, there are transitional adjustments included to minimize budget impacts that inevitably occur when making major changes.

In the end, North Dakota’s K-12 funding formula provides a base of financial support per student sufficient to provide an adequate education by school districts, regardless of where the student lives or what the taxable valuation is of the district.

The Legislature, through the interim Education Funding Committee, contracted with Picus-Odden and Associates to conduct a recalibration study to confirm the adequacy of that base level of support.

The consultants use an evidenced – based (EB) model to determine the resources necessary to educate students to college and career ready proficiency. Included in the model are all of the components necessary to meet the standards. This includes core staffing, administration, operations, professional development, technology and instruction materials. Their report was presented to the Interim Education Funding Committee in June, 2014. The report can be found in the meeting minutes at <http://www.legis.nd.gov/assembly/63-2013/interim/15-5088-03000-meeting-minutes.pdf?20141016152129>.

Projection Notes

1. ADM is projected using a 5 five year cohort survival routine with 2015-16 fall enrollment as the base.
2. Taxable valuation increases were projected based on the change from taxable year 2014 to 2015.
3. Other In-lieu revenue was projected as follows:
 - Tuition revenue was held constant.
 - Mineral tax allocations were held constant
 - U.S. Flood was held constant
 - Other in-lieu revenue was held constant.
4. Other statistical data was based on data supporting the 2015-16 payment year.
